LIBRARY LIST

No.1

U.S.D.A. Library, Albany Branch, Western Regional Research Laboratory, Albany, Calif.

With this first Library List we begin an experiment. Since its beginning in 1940 this library has accumulated many pamphlets on a variety of subjects. Some of them have not been used, - perhaps because you don't know we have them, or for some other reason. But we thought an introduction to them might be a good idea. If some remain "wallflowers", then we can remove them from our shelves. If some prove popular, we'll keep them. The lists will be short, and we hope that the subject guide will make them easy to use.
